LETTER

from the Board

WELCOME

To the Entire FreeBSD Community!

Welcome to the premiere issue of *FreeBSD Journal*, our brand new, professionally-produced, on-line magazine available as a subscription or single issues through the various app stores, including Apple iTunes, Google Play, and Amazon Kindle.

In upcoming issues you will find feature-length articles and columns that address the entirety of the FreeBSD community. Our editorial coverage will be diverse, including topics like: managing large-scale system deployments, application development, systems programming, embedded systems, academic research, and general software development. All using FreeBSD.

This issue (Issue No.1) is dedicated to FreeBSD 10, the latest in the FreeBSD Project's line of major releases. The release of FreeBSD 10 brings many new features not seen in other open-source operating systems, including a brand new compiler toolchain based on LLVM, as well as mature support for ZFS as a first-class, kernel-based filesystem.

FreeBSD Journal will publish six issues per year. The Editorial Board has already planned the first year with issues that will cover FreeBSD 10, pkgng (Packaging Next Generation), Networking, Virtualization, Development Tools, and Support for New Hardware Features.

FreeBSD Journal is supported by the FreeBSD Foundation (www.freebsdoundation.org), a 501(c)(3), not-for-profit organization, whose sole purpose is to help the FreeBSD Project grow and flourish. Your subscriptions and the advertising revenue the journal produces help to offset the costs of acquiring, developing, designing, and delivering this information to you.

We trust you'll like what you see in *FreeBSD Journal* and hope that you'll tell everyone you know about it. Thanks for taking a look.

Sincerely,

FreeBSD Journal
Editorial Board
