

#### **Editorial Board**

John Baldwin • Member of the FreeBSD Core Team and Chair of FreeBSD Journal Editorial Board

Tom Jones • FreeBSD Developer, Internet Engineer and Researcher at the University of Aberdeen

Ed Maste • Senior Director of Technology, FreeBSD Foundation and Member of the FreeBSD Core Team

**Benedict Reuschling** • FreeBSD Documentation Committer and Member of the FreeBSD Core Team

Mariusz Zaborski • FreeBSD Developer

### **Advisory Board**

Anne Dickison • Marketing Director, FreeBSD Foundation

Justin Gibbs • Founder of the FreeBSD Foundation, President and Treasurer of the FreeBSD Foundation Board

Allan Jude • CTO at Klara Inc., the global FreeBSD Professional Services and Support company

Dru Lavigne • Author of BSD Hacks and The Best of FreeBSD Basics

Michael W Lucas • Author of more than 40 books including Absolute FreeBSD, the FreeBSD Mastery series, and git commit murder

Kirk McKusick • Lead author of *The Design and* Implementation book series

George Neville-Neil • Past President of the FreeBSD Foundation Board, and co-author of The Design and Implementation of the FreeBSD Operating System

> Hiroki Sato • Director of the FreeBSD Foundation Board, Chair of AsiaBSDCon, and Assistant Professor at Tokyo Institute of Technology

Robert N. M. Watson • Director of the FreeBSD Foundation Board, Founder of the TrustedBSD Project, and University Senior Lecturer at the University of Cambridge

# LETTER from the Foundation

elcome to the March/April issue of the FreeBSD Journal! This issue is all about development, whether of FreeBSD itself or using FreeBSD as a platform for developing other software. We open with a practical guide to FreeBSD kernel development from Navdeep Parhar. Navdeep describes a flexible and robust setup featuring virtual machines and the use of PCI passthrough for device driver development. Next, Ben Cooksley pulls back the curtain on KDE's CI system outlining how the KDE project tests changes on FreeBSD. Tom Jones covers kernel debugging support in LLVM's debugger (Ildb). Specifically, Tom provides an example of extending Ildb with new commands written in lua. Finally, Mark Johnston narrates the story of ZFS support in the makefs tool. While this is a useful feature for both users and developers, Mark used FreeBSD's unique development environment to implement it.

One of the best places to swap development stories is at conferences whether in the hallway track between talks or over evening dinners. Olivier Certner provides a detailed glimpse into EuroBSDCon 2023 held at Coimbra, Portugal. A full slate of BSD conferences are planned this year including AsiaBSDCon (just completed), BSDCan May/June in Ottawa, Canada, and EuroBSDCon in September in Dublin, Ireland.

As always, we love to hear from readers. If you have feedback on any of our articles, suggestions for topics for a future article, or are interested in writing an article, please email us at <u>info@freebsdjournal.com</u>.
